Growth of Lee District Necessitates Increased Water Supply.

At a meeting of the Council Committee on Water last night the Superintendent of Water Works recommended that the pumping station at the standpipe be enlarged and that a centrifugal pump be installed. The improvements, it is estimated, will cost about \$8,000. A subcommittee was appointed to investigate and report the advisability of doing the work. It was stated by the superintendent that the pumps which are now in operation are not sufficient to keep the standpipe filled with water without utilizing them constantly. It is desired that the additional pump be kept as an auxiliary in case of emergency.
